

## All Material Handling, Inc. Introduces Weld-on Bucket Hooks

All Material Handling, Inc. (AMH) introduces their WBH grade 80 alloy steel weld-on bucket hooks. Commonly used on excavator buckets, these weld-on hooks are designed for weldable attachment to equipment to provide a lifting/pulling point for easy attachment of slings and hardware.

The WBH range from 1 ton up to 20 tons WLL and are readily available from stock in the US. Customers now have a cost friendly alternative to pricier brands that may force them into potentially dangerous shortcuts. These hooks meet ASTM A952/A952M-2 and ASME B30.10 and have a 4:1 design factor. Welding instructions are provided with each hook. The forged-in batch code allows for full traceability. Replacement latches are also available from stock.

All Material Handling, Inc. is based in Chicago, IL and is a leading supplier of manual chain hoists, trolleys, beam clamps, grade 100 chain and fittings, wire rope hooks, plate clamps, synthetic slings, and other lifting products. AMH has regional stocking warehouses to meet your needs in Des Moines, IA, Houston, TX, Monroe, GA and Portland, OR.
